Basin	Non required – decrease in impervious coverage
Lighting	High Efficiency
Site Size	3 Acres

DESCRIPTION

Razing the existing facilities to construct a new, state of the art elementary school was the goal that has been achieved. Working directly with the Architect and the School District, Stout & Caldwell has provided conceptual design services, complete civil engineering for a major site plan, land surveying, wetland delineation and other ancillary services. The project has now been bid and will be in the construction phase in late 2007. Renderings by the Thomas Group.
